October 28–30, 2019 | Minneapolis Convention Center

**“The future is already here.
It’s just not evenly distributed
yet”**

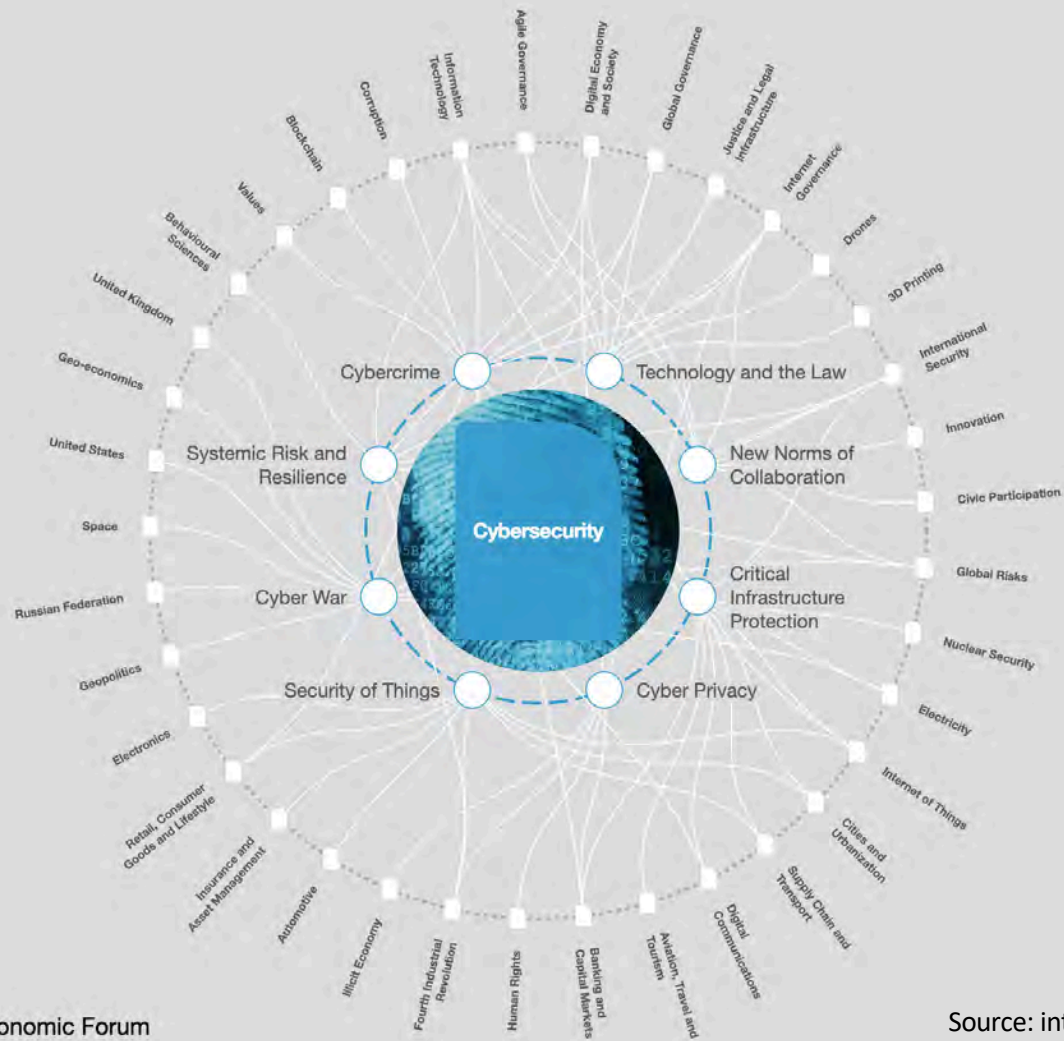

-- Commonly attributed to William Gibson

4th

Today's problems

- Demonstrating integrity (SOX) on NoSQL and non-guaranteed delivery message busses
- Software supply chain security
- Authentication and access controls in SASS
- Vulnerability management in containers

Yesterday, Today, or Tomorrow?

Yesterday's Solutions

- Technology based
- IP based
- Static
- Tollgates
- Rule based
- Complex

Tomorrow's Solutions

- People based
- Identity based
- Dynamic
- Agile
- Behavior based
- Simple

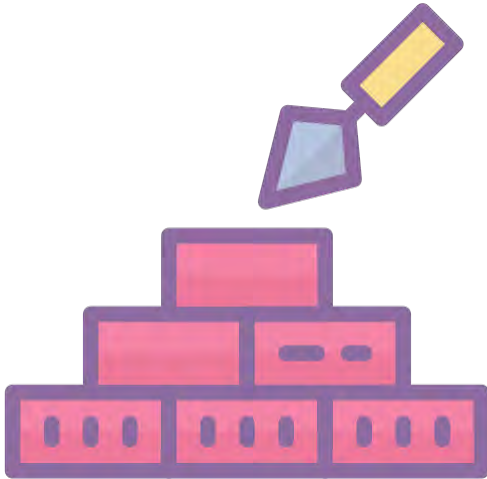

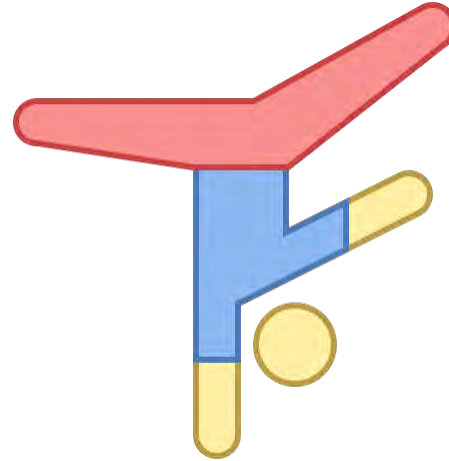

Identity vs. IP

Static vs. Dynamic

Tollgates vs. Agile

Complex vs. Simple

Rule based vs. Behavior based

Solving for Tomorrow

Thank You!
